

Typhoon

Okinawa's climate is warm and humid. The average temperature ranges from 55F to 90F with humidity ranging from 55% to 93%. The rainy season in Okinawa begins in April and ends in June which is followed shortly after by the typhoon season. Typhoon season in Okinawa starts on June 1st and continues through November 30th each year.

For those of you who have never experienced typhoons, please make sure outdoor objects – Bicycles, laundry poles, barbecue grill, etc. - are secured inside. Please bring in outdoor plants and other objects that could be blown away by heavy winds. You will be responsible if your items caused the damage.

Make sure your phones, portable chargers and other devices are fully charged. Stock up on water, batteries, flashlight, non-perishable goods, hygiene products and first aid kit. We recommend filling your tub with water and fill your car's gas tank.

If the power goes out, you can gather some information from Okinawa electric company by calling them or by checking their website. <https://www.okiden.co.jp/en/>

For more information on Typhoon, please go to this link below.
